Plant Management Solutions

TRENDS Enterprise Asset Management

Plant Management Solutions

There are a number of reasons for Predictive and Preventive Maintenance. It is absolutely essential, in industries where, unpredicted downtime error cannot be tolerated

Moreover, every shutdown and hence delay in delivery increases customer frustration, increases costs of repair and hence overstock of spare parts

TRENDS Enterprise Asset Management

Plant Management Solutions

Trends Enterprise Asset Management

TRENDS Enterprise Asset Management solutions provide a full, clear view of an organization's asset infrastructure and the workforce maintaining it. Our capabilities extend beyond traditional production assets. With our solutions, you can manage fleet assets (mining vehicles to carpools), linear assets (roads, rail, and transmission) and facilities (schools, office buildings). With Mincom, you can manage multiple asset types and still have one clear view of the entire asset infrastructure.

Benefits

- improves asset use
- ensures equipment readiness and safety
- increases plant and equipment productivity
- decreases life-cycle costs.
- manage the lifecycle of an asset from design through operational life to disposal
