

# Chairman's Message

Dear friends,

The global economic scenario, the rapid rate of technological advancement, the information revolution, all have opened new series of challenges as well as opportunities. The ability to innovate and the capacity to adapt to latest technologies are going to be the forte in the new century.

Our group of industries have always nurtured technology and we realized that to meet the challenges and grab the opportunities thrown by the open world there is a need to embrace Information Technology. Personally, I realized, that we have enormous talent around us and we can effectively use the talent to meet our Software needs and this realization led me to introduce the IT division of Tulasi group - Impecsoft.

The vision we had for the organization is to deliver Enterprise Solutions that would benefit all Small and Medium Enterprises. A person doesn't need a heart specialist for a simple cold. We need effective business solutions and not enormous business solutions with mountainous license and hardware costs. We need solutions that can be easily absorbed by our long standing human resources. We need solutions that minimize our costs and maximize information benefits.

Today, it gives me great pleasure to present to you our ERP product – TRENDS – Tulasi Enterprise Solution. The product is available with flexible business models to suit all stages of businesses. I am also happy to share that we have now expanded our horizon to provide our technology services for multinational organizations.

As a Group, Tulasi remains committed to corporate and social responsibility. In all of our actions we strive to ensure that all economic, environmental and social factors are considered. We believe that this approach, driven by our principles of respect, rigor and involvement, makes us more responsible and informed as a company.

Sincerely
