

# *Managing Your Export Sales Functionality*

## TRENDS EXPORT SALES

### Impecsoft Technologies

This document explains the features of TRENDS Exports that help in managing the complexities of Export Sales.

TRENDS Export Sales allows to execute different export business transactions based on sales documents defined in the system. Deliveries and billing documents can be created and processed from this module. Some sales documents automatically trigger the creation of subsequent deliveries and billing documents.

---

## ***Export Sales***

Exports and imports play a vital role for any business that is involved in international Business. In international Business, the company needs to take care of many complexities involved in the documentation and voyage.

In layman terms, exports mean the transfer to goods from origin country to the destination country. However, in actual terms, this starts from getting an order to production and shipment of goods which involves many intermediary functionaries and procedures.

These complexities expose the traders or companies to look for an integrated solution that caters to the export procedures and processing effectively and more efficiently in an easier and cheaper way.

***Impecsoft provides a Complete ERP  
solution to your Exports – TRENDS Export  
Sales.***
